Unit 3 · Session 12 · SLO 2 — Solved Worksheet

Name: AKARSH MURALI AKARSH MURALI | **Reg. No:** RA2511030010067

Unit – 3 : Session – 12 : SLO – 2 | Document and Present the Complete Project in Dissertation Form

I. Fill in the Blanks

1. Introduction (Problem Statement) — the section that describes the problem being addressed.
2. Tools and Technologies (System Specifications) — lists the technologies, tools and platforms used in the project.
3. Conclusion (and Future Work) — summarizes key findings and suggests future improvements.
4. Introduction (first content) page — page numbering begins from the first content page, not the cover page.

II. True or False

1. FALSE — the abstract appears at the very beginning of the dissertation, right after the title page.
2. TRUE — GUI screenshots belong in the Implementation (or Results) section as evidence of the working system.

III. Multiple Choice

1. A — the standard order is Abstract → Introduction → Implementation → Conclusion → References.
2. C — the Implementation section carries code snippets, database schemas and screenshots.

IV. Identification

1. Missing heading: Introduction — between Acknowledgment and System Design the report needs an Introduction (with the problem statement and objectives).
2. Formatting error: C — "visited: today's date" is not a proper date; references must carry an actual access date (e.g. Visited: 15-Sep-2025), and ideally author/title capitalization should also be fixed.
