Unit 3 · Session 6 · SLO 2 — Solved Worksheet

Name: AKARSH MURALI AKARSH MURALI | **Reg. No:** RA2511030010067

Unit – 3 : Session – 6 : SLO – 2 | JDBC Connection and Statement

Worksheet (Answers)

• Fill: The Connection interface is used to establish a CONNECTION (session) with a database.
• T/F: Statement executes SQL queries dynamically compiled at runtime. — TRUE
• MCQ: Method used to execute a SELECT query using Statement → B) executeQuery()
• Fill: getConnection() of DriverManager returns a CONNECTION object.
• Find the output: SELECT 'Java' AS lang → A) Java
• T/F: createStatement() of Connection returns a Statement object. — TRUE
• MCQ: Method for INSERT/UPDATE/DELETE → C) executeUpdate()
• Fill: The Statement object must be created from a CONNECTION object before executing queries.
• Identify the error: new Statement() → B) Statement cannot be instantiated directly
• Fill: To retrieve data from a ResultSet, we typically use the method GETXXX() (e.g., getString()/getInt() with column name or index).
